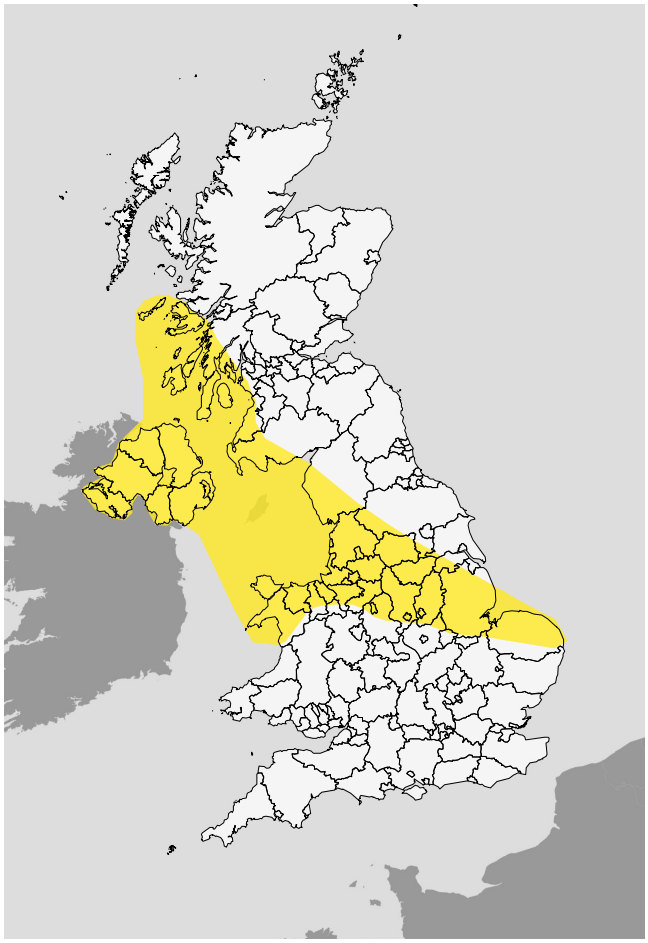
Yellow warning
Wind

Between
15:00 Thu 5 Dec 2024 and
06:00 Fri 6 Dec 2024



Some disruption possible from strong and gusty winds.

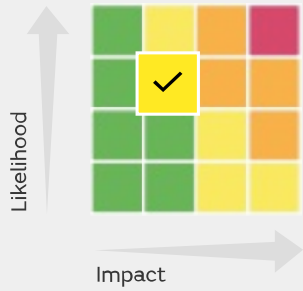
What to expect

- It's likely that some coastal routes, sea fronts and coastal communities will be affected by spray and/or large waves
- Some delays to road, rail, air and ferry transport are likely
- Probably some bus and train services affected, with some journeys taking longer
- Delays for high-sided vehicles on exposed routes and bridges likely
- Some short term loss of power and other services is possible

Further details

Westerly or northwesterly winds will increase across Northern Ireland, parts of Scotland, north Wales, northern England, the north Midlands and East Anglia during Thursday afternoon and evening. Inland gusts of 40-50 mph are possible, with perhaps 60-70 mph along exposed coasts, especially through the North Channel and Irish Sea, causing some travel disruption. Strong gusts will also be associated with heavy showers which move through at times.

What should I do?



Medium likelihood of low impacts

06:00 Fri 6 Dec 2024

Further Details (continued)

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If you are on the coast, stay safe during stormy weather by being aware of large waves. Even from the shore large breaking waves can sweep you off your feet and out to sea. Take care if walking near cliffs; know your route and keep dogs on a lead. In an emergency, call 999 and ask for the Coastguard.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
